

The Delicious Peace Party Guide

Delicious Peace is an award-winning social change film that tells the story of Christian, Muslim and Jewish farmers in a small Ugandan village who put aside their differences to form the Delicious Peace Coffee Cooperative, hoping to improve their lives and provide for their families.

After establishing a partnership with a Fair Trade buyer in the United States, business expanded and the Co-op flourished. Out of their success grew trusting relationships, friendships, and greater peace in their community and region.

Celebrate the farmers and join the Fair Trade movement by spreading their story and inspiring simple actions that bring great social change across the world.
